asyut, Egypt

PROJECTS

CXO ERP+

ERP+ CXO is a powerful mobile application designed for executives to manage daily business operations efficiently. It provides real-time access to critical business functions, ensuring seamless decision-making and enhanced productivity.

PM ERP+

PM ERP+ is a mobile application designed to streamline project management by integrating seamlessly with the ERP+ PM backend module. It offers a comprehensive suite of features, including: Creating and managing new projects, Tracking project logs and invoices, Managing tasks, Recording timesheets, Submitting and approving team timesheets

Selivery client app

Application to facilitate the transportation process and display the sale and rental of cars and various means of transportation

Selivery driver app

Application to facilitate the transportation process and display the sale and rental of cars and various means of transportation

Click and learn

A Flutter-based app enabling students to purchase courses and teachers to conduct online classes, including integrated Zoom sessions for real-time learning.

Omera

Flutter-based service app that enables companies to offer their services and clients to order them seamlessly. The app features an integrated chat system for real-time communication between companies and clients, ensuring smooth coordination and enhanced user experience.

IVF SYNC (flutter_desktop)

A desktop application built on Flutter designed to manage embryo lab operations with high efficiency and accuracy. It offers a sophisticated and easy-to-use user interface that helps technicians and physicians track and manage patient and sample data in an integrated manner.

Smart parking system

A software application that enables users to find and reserve available parking spaces in real-time using their mobile phones. The app uses a combination of GPS and sensors to determine the location and occupancy of parking spaces, making it easier for drivers to navigate and find available parking spaces.

Fruit Market App

An e-commerce application built using Flutter. This app allows users to explore and purchase a variety of fruits from the comfort of their mobile devices. It provides a user-friendly interface, seamless navigation, and convenient shopping features.

Coffee App

An application designed for coffee lovers who want to find and order their favorite coffee drinks from the convenience of their mobile device. The app provides an easy-to-use interface that allows users to easily browse a variety of coffee options, customize their orders, and place them for pickup or delivery. Mobile applications. It integrates with an API that provides data about cafes and drinks
